

## Oxygen gas sensor -No influence from acid gas

### Features

- High performance with long-term stability [Fig. 1]
- Unaffected by acid gas such as CO<sub>2</sub>, H<sub>2</sub>S (using unique acid electrolyte)
- Low cost

### Specifications

|                                  |                               |
|----------------------------------|-------------------------------|
| Principle                        | Galvanic cell type gas sensor |
| Model                            | OC-6B                         |
| Detectable gas                   | Oxygen                        |
| Detection range                  | 0~100%                        |
| Response time (T <sub>90</sub> ) | < 10 seconds                  |
| Operating temperature            | -10°C~45°C                    |
