

# Indoor Air Monitor

## A clear indication of air quality

### This chic advertising medium enhances comfort and health

The mini air quality sensor from AppliedSensor ensures that there is always a good atmosphere in the office and at home. This little USB tool reacts to unpleasant odours and even indicates micro-small quantities of toxic hydrocarbons in the air – genuine health protection in a small format.

The air quality sensor runs from a USB power supply unit or any USB slot in a PC. The related software can be downloaded free from the internet.

- Ideal as a lasting advertising gift
- Helps save energy – a green product
- With logo on request
- Customized advertising possible

**+49 (0) 71 21 - 51 486 - 11**

**info@appliedsensor.com**

**or use the order form overleaf**

**Red, yellow, green:**  
the LEDs in traffic light colours show you when it's time to air the room again.

Contributes towards efficient meetings ...

... and ensures good air quality at home.
